

Webcam & Audio

Webcam & Audio

Collaboration solutions have become critical for organizations to stay connected.

Engineered with intelligent features, Dell Webcam & Audio devices allow you to connect and collaborate with ease no matter where you work.

Webcams

Elevate your video-conferencing experience with Dell webcams that deliver professional-grade video quality with built-in intelligent features.

Earbuds

Our AI-based earbuds deliver crystal-clear calls and premium sound quality, designed to perform effortlessly in any environment. Whether used on its own or alongside your headset, it seamlessly adapts to your work or lifestyle needs.

Headsets

Enjoy superior call clarity with these AI-based headsets that provide a comfortable and distraction-free calling experience. Collaborate with ease anywhere with our range of Teams and Zoom certified headsets, also compatible with leading UC platforms.

Speakerphones

Designed to provide clearer and easier communication, these speakerphones offer a great hands-free conferencing experience at home, at work or on the go.

Soundbars

Add a rich audio solution to your setup with Dell soundbars that perfectly complement your Dell monitors in design, offering a clean desk experience.

Webcam

Elevate your video conferencing experience with Dell webcams, engineered with intelligent features and delivering up to 4K resolution for high-quality collaboration.

Exceptional image quality

Enjoy professional-grade visuals with 4K or 2K cameras with a built in Sony Sensor, multi-element lens and Advanced Image Signal Processing, ensuring video quality is optimized in all lighting conditions. Intelligent features* such as AI auto-framing and auto-light correction help you look your best, always.

Thoughtful design*

Dell webcams are thoughtfully designed to enhance the user experience. Mounting clips make it easy to attach the webcam to your monitor while built-in noise-reducing mics enable clear communication and a shutter cap helps protect your privacy.

Seamless collaboration

Tested to work seamlessly with all Dell hardware and unified communications (UC) platforms, our Microsoft Teams- and Zoom-certified webcams are easy to connect and deploy. Use Dell Peripheral Manager to customize the webcam settings to your preferences and get ready to present your best.

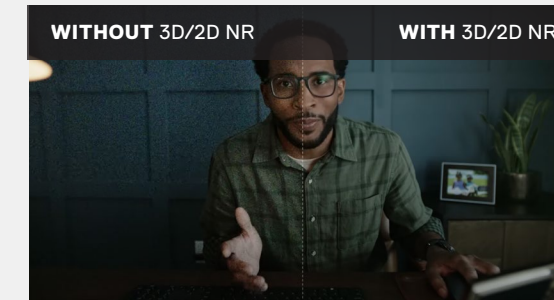

Features at a glance*

Adjustable Field of View (FOV)

Position the tilt adjustable camera (0-20°) to the angle you want and customize how much you want to show of your surroundings by adjusting your field of view to 65°, 78°, 90°. Get closer to your audience than ever before with up to 5X digital zoom.

Automatically eliminates grainy images

Temporal Noise Reduction (3DNR) and Spatial Noise Reduction (2DNR) eliminates motion blur and grainy images, ensuring crisp and clear picture quality even in low light.

Protect your webcam lens, and your privacy

A magnetic shutter cap allows you to effortlessly cover the webcam's lens for privacy and protecting it when not in use. When it's time for a call, the cap can be conveniently stowed behind the webcam.

Intelligent framing to keep you centered

Advanced AI auto-framing tracks your movement, keeping you at the center of the frame, however you move.

Stunning clarity

Choose between a 4K UHD or a 2K QHD webcam with a large Sony STARVIS™ sensor, that takes in substantial light, delivering vibrant images.

Look your best even in extreme lighting conditions

The perfect combination of Digital Overlap HDR (DOL-HDR) and Facial Detection Auto Exposure (FDAE), automatically optimizes image quality to help you look your best, always.

Get to work, fast

Presence Sensing technology automatically lock/unlock your device when you walk away or return, and uses Windows Hello to log you in

Earbuds

Elevate your audio experience with our AI-based earbuds designed to deliver exceptional call clarity and immersive sound. Perfectly suited for modern workstyles, these earbuds combine advanced technology with a sleek, portable design to adapt seamlessly to your professional and personal needs.

Clear and Focused Communication

Built for busy work environments, these earbuds feature advanced noise-canceling technology to minimize distractions and ensure your voice is heard clearly. Noise management modes help you stay focused while maintaining awareness of your surroundings when needed.

Effortless Connectivity & Controls

Stay connected with reliable, easy-to-use features like multi-device switching and intuitive touch controls. Certified for Microsoft Teams (Open Office) & Zoom, these earbuds integrate seamlessly with your professional tools. Designed for smooth transitions between workspaces, these earbuds ensure consistent performance wherever your day takes you.

Comfortable and Adaptable Design

With customizable fit options and durable construction, these earbuds are built for all-day wear. Paired with Dell Display and Peripheral Manager and Dell Audio for personalized settings, they adapt to your unique preferences and work environments, making them a versatile choice for any professional setting.

Headsets

Elevate your communication with Dell's largest portfolio of AI-enabled collaboration headsets*. Experience exceptional audio quality for crystal-clear conversations, creating a truly collaborative experience.

Superior sound quality

Immerse yourself in conversations with our headsets, featuring intelligent AI-based noise-cancellation¹ technology and active noise cancellation. Experience consistently clear audio in any environment, setting the standard for true collaboration.

Designed with purpose

Crafted with productivity and comfort in mind, Dell's headsets are built with premium materials, intuitive smart touch controls¹ and smart headband sensors¹ to suit a variety of workstyles.

Seamless collaboration experience

Collaborate with ease thanks to headsets certified for the highest levels of Microsoft Teams (Open Office)² and Zoom¹. Stay connected with effortless connectivity, pairing, and personalized settings to suit the way you work with Dell Display and Peripheral Manager.

*Based on internal analysis on commercial collaboration headsets with AI-enabled noise cancellation mics, Jan 2025.

1. Product availability may vary by region and product features may vary by model; please refer to Dell.com for more details.

2. Open Office qualification includes the strictest test on how the headset microphone suppresses surrounding noise and office conversation from multiple directions.

This certification provides the ultimate assurance that the headset meets the premium microphone standard in an open office environment.

Features at a glance*

AI-Noise Cancellation Microphone

Utilizing a robust AI-based processing model, our intelligent noise cancellation distinguishes human speech signals from background noise and filters out unwanted noise with precision, ensuring uninterrupted, crystal-clear communication. Selected models feature uplink noise cancellation, which removes unwanted noise from your surroundings so that your audience can hear you clearly, and downlink noise cancellation, which removes noise from your audience's surroundings allowing you to hear them clearly.

Microphone

Headsets are available with a range of microphone types, including discreet or bi-directional boom microphone. For ultimate convenience, mute or unmute quickly and efficiently with the mic flip feature.

Headband sensor

The smart sensor located in the headband and earcup automatically activates a range of intelligent features when either of the ear cups (Advanced smart sensor)/ entire headset (smart sensor) is lifted, saving you time by not having to manually mute/pause/play. Battery life is extended even further thanks to the smart sensor's faster activation of low power mode.

Active Noise Cancellation

Choose from a range of Active Noise Cancellation options, including Hybrid and Adaptive ANC, that neutralize and cancel unwanted ambient noise, making it easier to focus on what you're listening to.

Find the right headset for you

AI-based Noise Cancellation (Talk)

I want to be heard clearly by my audience in noisy environments.

All our new Dell Headsets feature built-in AI-Noise Cancellation microphone that intelligently distinguishes human speech signals and filters out background noise, so that your audience can hear you clearly.

Noise Cancellation (Listen)

All our headsets come with memory foam ear cushions (Passive Noise Cancelling) designed for instant noise isolation.

A variety of Advanced Noise Cancelling options are also available for different scenarios

When I am in a noisy environment

When my audience is in a noisy environment

Active Noise Cancellation (ANC) cancels unwanted background noise so you can focus on what you are listening to.

Hybrid ANC combines internal and external noise cancelling for an even more refined and focused listening experience.

Adaptive ANC intelligently changes the levels of noise cancellation according to the surroundings, reducing environmental noise.

AI-NC removes unwanted noise from your audience's surroundings (incoming audio), so you can hear them clearly.

Dell Display and Peripheral Manager¹ for Webcams

Get the Most from Your Webcam

Personalize your webcam settings and activate intelligent features to optimize performance. With Dell Display and Peripheral Manager, you can easily enable and customize features and settings based on your preferences, ensuring your webcam delivers the best results for every use case.

Simplify Peripheral Management

Save time and boost IT efficiency with the Dell Device Management Console to manage your Dell peripheral fleet at scale, from a single cloud-based console. Discover expanded Command Line Interface features from Dell Display and Peripheral Manager.

[Learn More about Dell Display and Peripheral Manager](#)

*Product features may vary by model; please refer to Dell.com for more details. All software user interface images shown here are for illustrative purposes only and may vary from actual.

1. Dell Display & Peripheral Manager is compatible with Win OS (10, 11, 11 on ARM) and Mac OS (12, 13, 14 and 15) only.

Get to work, fast

Presence Sensing technology automatically lock/unlock your device when you walk away or return, and uses Windows Hello to log you in.

Look great, always

Enable HDR and Auto White Balance feature that will help deliver true-to-life colour in extreme lighting environment.

Keeping you in focus

Enable AI auto framing that help tracks your movement and keeps you at the center of the picture, however you move. You can also control tracking sensitivity, framing size and camera transition.

Enhanced experience

Select video presets as well as creating your own custom preset. Other customizable user settings include color adjustment, brightness, sharpness, contrast, resolution and frame rate.

Present your best

Customize how much you want to show of your surroundings by adjusting your **field of view**. Get closer to your audience than ever before with **digital zoom** and **auto focus**.

Best for face-to-face conversations

Keeps you as the main focal point of the scene while providing more context for your location.

Wide-angle, ideal for showing objects or whiteboard content

Dell Display and Peripheral Manager¹ and Dell Audio app² for Earbuds

Customize your earbud's features with Dell Display & Peripheral Manager¹ or Dell Audio app², conveniently accessed from your smartphone.

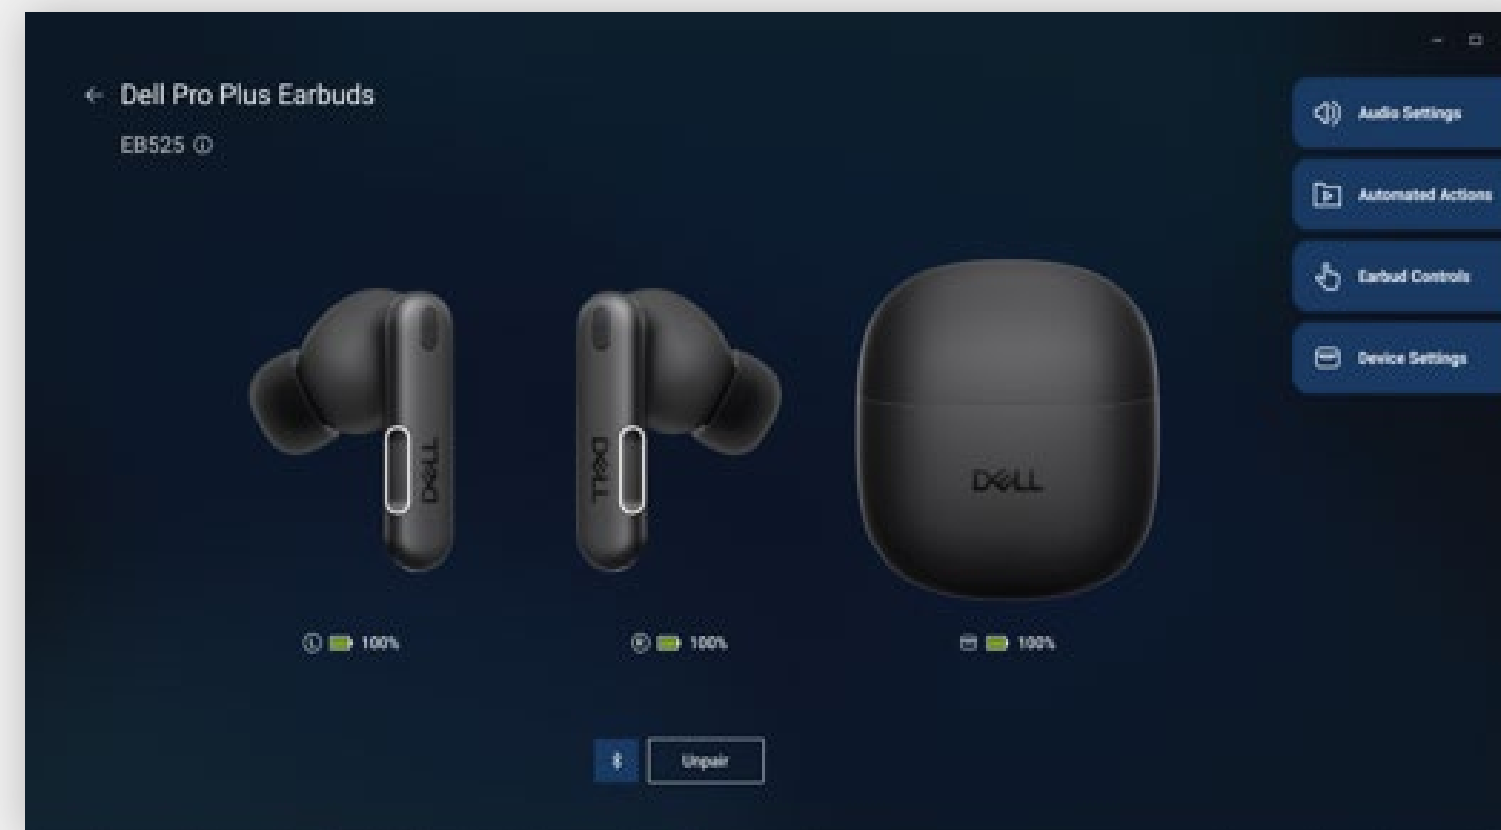

Personalize Your Audio Experience

Take control of your sound with customizable audio settings. Adjust device preferences, assign preset modes like Speech, Bass Boost, and Treble Boost, or create your own audio presets using the Audio Equalizer. Tailor earbud controls for calls and multimedia, stay up to date with the latest firmware, and never lose track of your earbuds with the convenient 'Find My Earbuds' feature³.

Simplify Peripheral Management
